ABOUT
PET HEALTH**

**PRIVATE LABEL
PET HEALTH PRODUCTS**

GARMON CORP.

**Animal
Essentials**

All About Pet Health is an umbrella organisation for the European operations of Garmon Corporation USA and Animal Essentials USA. Both have devoted over 25 years to creating and supplying product solutions to support the health of pets. The range of delivery methods includes tablets, powders, liquids and soft chews. All products are created by our own in-house formulators, scientists and veterinarians.

Overby Farm products are manufactured by our parent company Garmon Corporation of America. Garmon Corps participates in a rigorous certification programme that audits their business processes. Auditing is undertaken by Underwriters Laboratories (UL.com) who conduct an annual Good Manufacturing Practices assessment as per the American National Standards Institute. U.L. are annually audited to ensure their systems conform to ISO 17065. The scope for Garmon Corp's U.L audit is specified as ...'the manufacturing, packaging, warehousing and storage of powder, liquid, tablet & chew format veterinary dietary supplement products'.

Many North American retailers now require U.L. certification as a prerequisite to supply, and an ongoing quality monitor for retailer owned branded products.

Animal Essentials are specialists in botanicals. We use only Certified Organic or ethically Wild Harvested Herbs. All our suppliers have their Certificates of Origin reviewed for acceptability, with ingredients quarantined on arrival until tested inhouse for pathogens, mold & yeast, & platelets. Further samples are then tested, archived by Lot No. and retained for 3 years by an independent external analytical lab to provide a chain of custody pathway for any recalls. Animal Essentials are audited by the National Animal Supplement Council (of USA) and follow the conduct & ethics attached to the following seals, USDA Organic, OCIA (Organic Crop Improvement Assoc) and Oregon Tilth.

As manufacturers supplying private label clients for over 20 years we realise the opportunities for synergies and cost savings that private label offers. So what are some of the reasons and benefits it offers ?

If you are new to PL benefits include:

Ownership & Control

- 1) Control will include the language, personality, & taglines attached to the brand.
- 2) Freedom to describe product features in your own way.
- 3) Freedom to create your own theme for packaging, design & style.
- 4) Discretion to choose market channels.
- 5) Pricing. Control of margin, with potential for greater profit.
- 6) Opportunity to create trust & loyalty in ways as befit your brand image.

For established and new PL clients alike to gain the most from the partnership with a manufacturer there needs to be trust, regular contact and a shared clear strategy. Manufacturers have history on product sales and fails, knowledge of ingredients, materials, shipping and storage, as well as specialist skills in bespoke product development. Our long established touchpoints with all the contributors of finished product means we can either offer advice directly or signpost customers to the relevant specialist.

The route to market for consumer products is evolving at a prodigious rate, and in ways hard to anticipate. Online is just one facet of the burgeoning 'widescreen of choice' facing consumers. Competing for shelf space in traditional retail can be expensive and is rapidly becoming about catching consumer attention based on a basket of qualities, from price, visual appeal, convenient product & packaging format as well as the halo effect of brand.

To attract recurring business, retail Private Label needs to create trust and loyalty in the same way as named brands. With the right inputs and strategic thinking, Private Label provides a way to achieve this, with the potential for higher margins and a wholesale income from carefully selected secondary channels.

So how can we help you meet your goal ?

Our long history in formulating and manufacturing pet health products means we have an extensive catalogue of pet health solutions available. Subject to production run minimums we can also offer bespoke formulations.

To meet with UK and EU consumer legislation our experts take rigorous care to ensure our baseline label content is correct and accurate. For added assurance we are registered (via Kent County Council) with the Trading Standards Primary Authority Scheme to receive assured legal advice and give peace of mind to our customers.

So what's in a label ?

As the brand owner you have the vision of the personality and brand values you wish attached to your brand. Labelling plays a significant role in the presentation and support of those values to the consumer. To streamline communications we put you in direct contact with our labelling supply partners who draw on a wealth of experience and satisfied clients to produce a bespoke product with the look and feel that meets your requirements. They can also offer technical and design guidance if required. See below a brief summary of the spectrum of finishes available:

Specialty varnishes, Specialty laminations, Spot varnishes & laminates, High build printing, Embossing, Foiling, Metallic printing, Braille printing, Specialty thermochromic (temp responsive) and 'glow in the dark' inks.

An additional service is multi layer 'peel & reveal' labels for multi-lingual and space restricted applications. For peace of mind prior to order placement pre-production samples are available from your artwork.

ALLERGY AIDS.....6-7

Provides a source of natural antioxidants to support a normal immune system.

CALMING AIDS8-11

Some situations that cause stress to our pets are unavoidable (car travel, storms, fireworks, separation). Calming aids are intended to help manage the negative physical effects.

DIGESTIVE & BOWEL AIDS12-18

Healthy functioning of the digestive system and bowel function are fundamental to properly metabolising our food, and this will contribute to a pet's long and happy life.

GROOMING AIDS19-21

Bright eyes, clean teeth and alien odour control.

JOINT HEALTH22-24

Prolonging the active life of our pets depends heavily on their joint care. Our formulations are designed to support at every stage, from puppy to senior.

LAWN CARE25

Reduce unsightly yellow stains on your lawn. Our grass saver products also reduce stool odour.

REGULAR CARE.....26-27

These formulas include vitamins and minerals ideal for helping support pet digestion, skin, coat and joint health.

SKIN AND COAT CARE.....28-29

A glossy coat and healthy skin protect our pets. To help with this our formulas contain salmon oil and omegas 3 & 6.

TRAINING AIDS.....30

Pets chew for various reasons; teething, curiosity, separation, stress. Your pet can be trained to chew on appropriate objects. Make sure there are plenty of suitable chewing toys.

URINARY AIDS31-32

Healthy bladder control and urinary function make for a happy pet and happy owner.

ANIMAL ESSENTIALS.....33-38

Botanical collection.

Like humans, pets can acquire allergic reactions to climatic & environmental changes. Our soft chews and foam provide support inside and out, with the chews containing natural antioxidants to support immunity.

Allergy Aid For Dogs Soft Chews

Provides a source of natural antioxidants to support a normal immune system and assists in combating environmental pollutants. Rich in Omegas, DHA and EPA to help maintain proper skin moisture and respiratory health.

Allergy Aid Hot Spot Foam

Aller-911 Hot Spot Foam for dogs and cats with Aloe Vera quickly helps to relieve itchy, irritated skin while the bittering agent helps to deter gnawing and chewing. The quiet foam application is ideal for pets sensitive to sprayer noise. This gentle, quick-drying formula eliminates the need for ointments and gels. Aller-911 Hot Spot Foam can be used with spot on flea products. For hot spots on dogs and cats.

Aller-911's Complete Skin Care Line

For your pet's optimal health, it is important to address their skin & coat issues both internally and externally.

Aller-911 Internal

- Skin & Coat Supplements
- Calming Aid Plus

Aller-911 External

- Ear Wash
- Hot Spot Foam
- Anti-Lick Paw Spray
- Skin & Coat Shampoo

HOW TO USE: Shake gently. Apply 1 – 3 pumps on itchy, scaly or irritated areas of the skin. For optimal results pat softly to evenly distribute product. The quick dry penetrating

formula can be used up to three times a day or as needed. Avoid contact with eyes.

COMPOSITION: Polysorbate, Chembetaine, Sodium Benzoate, Citric Acid, Potassium Sorbate and Deionized Water.

Stock code: 70152-5

Stock code: 70101-3

All pets have to learn their place in our world. Sometimes circumstances and/or a pet's temperament demand a more direct approach. Our Bitter YUCK! product is a spray that is seriously unappealing to dogs & cats. A light spritz on the object needing protection will ensure your pet will seek to avoid future contact.

Bitter YUCK! No Chew Spray 236ml (8fl oz)

There is no job too big for Bitter YUCK! spray. The convenient trigger sprayer makes applying quick and easy. Our special water based formula will not sting or stain. Can be used directly on your pet's hot spots, fur, bandages, and more. Can be used on plants also. Stops pets from chewing on furniture, paws, wounds, and more. Stops dogs, cats & horses from chewing on:

- Hot Spots
- Summer Itch
- Sores
- Wounds
- Bandages
- Furniture
- Drapes
- Wood
- Paws
- Tails & Manes
- Bitter YUCK! may be sprayed over topical medication.
- Bitter YUCK! can be used on or around plants.

UNDERSTANDING WHY YOUR PET CHEWS:

Pets chew for various reasons; teething, exploration, separation anxiety, boredom and stress. Chewing is a natural animal behavior, so the goal is to effectively train your pet to chew on appropriate objects. Be sure your pet has appropriate chewing toys.

HOW BITTER YUCK! WORKS:

To most pets, Bitter YUCK! has an unappealing taste, making chewing on the particular sprayed object unpleasant and decreasing the unwanted behavior. Due

to the complexities of taste preferences and behavior issues, results may vary. It is important to monitor your pet's reaction to Bitter YUCK!. Be sure your pet is deterred by the taste before leaving them alone with the object being sprayed.

COMPOSITION: Deionized Water, Bittering Agent, and Citric Acid.

Stock code: 70110-5

As with humans, maintaining a healthy urinary tract is vital for the body to expel waste material. Animals cannot tell us when they have a UTI, but it is as painful for them as for us, and they can't tell us. Just 2 of our soft chews weekly should see them fine.

Animal Essentials

Healing Pets Naturally Since 1995

OUR BOTANICAL RANGE

Creatures living in close in touch with nature have long benefitted from botanical remedies. Modern companion animals have become integrated and codependent with modern man and as a result, less connected with nature. With the driving force and vision of its world renowned founder Greg Tilford, Animal Essentials' mission is to make nature's own toolkit of remedies available to companion animals in an easy to use form.

Our botanical range stems from the holistic belief that animals, plants and the environment need, honour and support each other. Studies are indicating that early man's capacity to identify plants with medicinal qualities continues to be present today in primates in other animals. How animals heal themselves is now attracting serious scientific attention. The arms race between mutating bacteria and antibiotic is driving a swathe of research programs to study and understand the healing properties of plants, especially in a world where thousands of plant species are disappearing every year.

Colon Rescue Herbal Tincture 30ml

Colon Rescue was created to help manage digestion and bowel irritation and promote a healthy gastrointestinal tract. Extracts contained all support the colon to help pets with diarrhoea or constipation.

Seaweed Calcium Powder 340g (12oz)

Calcium deficiency can cause restlessness, muscle twitching, stiffness and panting. Post thyroid surgery may also affect calcium levels. Our natural calcified product contains valuable nutrients in the form of very small porous particles. These qualities facilitate rapid digestion and thereby improve bioavailability of otherwise hard to absorb nutrients. Animal Essentials seaweed calcium also contains magnesium which helps calcium absorption into the bone.

- For supplementing calcium in home prepared or raw food diets
- Up to 50% better absorption than bone meal and other forms of calcium
- Tested for purity
- Sustainably harvested from the pristine sea beds of Iceland.
- Neutral flavored, odorless powder is easy to feed.

COMPOSITION: 100% Dehydrated Kelp.

Stock code: 400803-9
